Final Rejection

The Status of Claims

Claims 1-5 and 7 are pending.

Claims 1-5 and 7 are rejected.

Claim Objections

The objection of claims 3 and 7 are withdrawn due to applicants' convincing argument.

However, there is a new issue to be resolved in the current amendment.

Claim 1 is objected to because of the following informalities:

Claim 1 has been newly amended to the original claim in order to introduce the negative proviso in the following: "with the proviso that ethyl 3,3-dicyanoheptanoate is excluded" into the claim. However, the newly introduced limitation with the negative proviso is not present and shown in the original specification. A close inspection of the original claims and specification do not provide antecedent basis for the proposed changes. New matter can not be introduced into specification at any time during the prosecution, unless there is a supporting description that would support the proposed changes. Applicant is required to cancel the new matter in the reply to this Office Action.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claim 1-5 and 7 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

In claim 1, the negative proviso with the following:

"with the proviso that ethyl 3,3-dicyanoheptanoate is excluded"

is recited.

The negative proviso lacks description in the original specification. Therefore, the addition of the negative proviso to the claims does not provide antecedent basis for the proposed changes. New matter can not be introduced into specification at any time during the prosecution, unless there is a supporting description that would support the proposed changes. Applicant is required to cancel the new matter in the reply to this Office Action. The proviso lacks description. Even a negative limitation requires description, Ex Parte Grasselli, 231 USPQ 393.

Claim Rejections - 35 USC § 102

1. Applicants' argument filed 11/02/07 have been fully considered but they are not persuasive.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless —

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The rejection of Claims 1-5 and 7 under 35 U.S.C. 102(b) as being anticipated clearly by Roepel (Tetrahedron Letters 43 (2002) p.1973-1976).

The rejection of Claims 1-5 and 7 are rejected under 35 U.S.C. 102(b) as being anticipated clearly by Roepel (Tetrahedron Letters 43 (2002) p.1973-1976) has been maintained with reasons of the record on 8/02/07.

Applicants' Argument

2. Applicants argue the following issues:
 - a. Roepel merely discloses the compound ethyl 3,3-dicyanoheptanoate; therefore, the rejection of it must be untenable and should be withdrawn.

The applicants' argument have been noted, but these arguments are not persuasive.

First, with respect to applicants' argument, the Examiner has noted applicants' argument. However, this compound has inherently a pesticide activity. Furthermore, the introductory language of a claim drawn to the method of using the composition does not constitute a new use since the old composition possessed the property and applicants merely discovered this property. *In re Tomlinson*, 363 F.2d 928, 150 USPQ 623 (CCPA 1966). Therefore, applicants' argument is not persuasive.

Conclusion

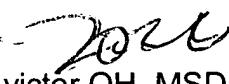

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

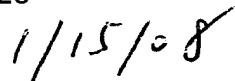

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
